## About Me

---

I am passionate about programming and technology, constantly seeking to improve my skills and knowledge in the field. My current goal is to become a professional back-end developer, applying my expertise to innovative projects. I am always learning new technologies and enhancing my abilities, both professionally and personally.

## Experience

---

### Talk2buy

QA Intern

📅 July, 2024 – Present

📍 Remote

- Responsible for creating technical documentation and writing articles, ensuring that all materials are clear, precise, and accessible to different audiences, facilitating understanding and proper use of the company's developed software.
- Responsible for general software testing, verifying functionalities, screen standardization, and designs to ensure the expected project outcome.

## Projects

---

### Buku — Node.js

12/2024

- Buku is a platform for exchanging used books, encouraging reading and sustainability. Users find titles of interest, send proposals, and the owner can accept or decline. Once confirmed, contact details are shared to arrange the exchange.
- My role in this project was developing the system's back-end, including the exchange system, user CRUD, and book management.
